IT'S ALL ABOUT LINES

There are straight lines,
there are curved lines,
There are elegant lines,
lines that break,
lines that twist,
lines that intersect.

We know almost everything about a line:
the starting point and the finishing point,
its length, its width.

Everything except what had in mind who have drawn it,
what he was thinking,
what was he feeling:
almost everything that's is behind a line.
